Terracotta Roof Tiles are offered with a Colour For Life Warranty.

This means that the roof tile you buy is warranted to remain the same colour for the life of the product.

All roofs installed by Bristile Roofing are offered with a 10 Year Total Roof Warranty.

This warranty states that we guarantee the roof has been installed properly and that the roof tiles and all accessory products we install are under warranty for 10 years*. No other roofing company in Australia offers this warranty.

Water collected off a tiled roof is safe to drink.

Water collected off a tiled roof is as safe to drink as water collected off most other roofing materials. The raw materials used to manufacture modern roof tiles are non-toxic and even when oxidised do not present a health risk.

Terracotta Roof Tiles are available in a huge range of colours and profiles.

Terracotta roof tiles are available in more colour and profile combinations than any other commonly used roofing product in Australia.

Terracotta Roof Tiles are excellent sound insulators.

Roof tiles can reduce noise by 30 decibels which is more than twice the noise reduction achieved by other commonly used roofing materials. This means that roof tiles reduce the intrusion of external noises into internal living areas.

Terracotta Roof Tiles won't corrode or rust.

Roof tiles are rust and corrosion resistant which means they are suitable for installation in Australia's harsh coastal environments.

Terracotta Roof Tiles are strong and durable.

Terracotta roof tiles must comply with strict standards in strength and are actually stronger than concrete roof tiles.

Terracotta Roof Tiles are fire resistant.

Roof tiles are ideal for use in bushfire prone areas as they are non combustible.

Terracotta Roof Tiles are lower in embodied energy than some competing roofing products.

Testing shows that terracotta roof tiles are lower in embodied energy than some other commonly used roofing materials.

Terracotta Roof Tiles can reduce cooling requirements.

Testing of similarly coloured roofing products shows that terracotta roof tiles can reflect more heat away from your home resulting in lower cooling requirements when compared with other commonly used roofing materials.
